

## Guidance notes for Packing & Inspection Service

When packing your turbocharger please ensure it is well packed to avoid any damage during transit.

- Incorrectly packaged turbo.
- Not enough packing material.
- Turbo & sensitive parts such as Actuator likely to be damaged.
- Box bottom not reinforced.

- Correctly packaged turbo.
- Turbo has packing material all round.
- Further box lining protection used. If foam is not available then card & other suitable materials can be used.

*Note: Turbocharger inspections require the complete strip-down of the unit. Whilst every precaution is taken not to damage any parts, on rare occasions damage may result as part of the strip-down process.  
Turbo Technics Ltd will not accept liability for transit damage as a result of incorrect packaging.*

Please sign this form and place inside the box with your Turbocharger.
